Lennox Introduces the New Commercial Touchscreen Thermostat

DALLAS, TX – March 6, 2006 – Lennox has expanded their commercial thermostat product offering with the addition of the new Commercial Touchscreen Thermostat. This new thermostat features an intuitive touchscreen interface for ease of programming and use.

Performance Specifications:

- Two stage heating/cooling conventional or heat pump thermostat
- Remote sensors (wall, duct and averaging) are available

Features and Benefits:

- Intuitive touchscreen interface provides ease of programming and ease of use
- Designed for wall or remote programming so it can be programmed comfortably before being placed on the wall
- Flexible thermostat for conventional and heat pump applications means only one part to stock
- Seven day programmable with up to four periods per day allows the flexibility to meet most scheduling requirements
- Economizer output can be used to meet outdoor air requirements, or can be used to trigger other events (e.g. lighting) based upon the schedule
- Title 24 compliance means that it will meet outdoor air and energy requirements in California
- ENERGY STAR®-qualified to meet eligibility requirements for rebates in some markets
- A backlit display means that the interface is easy to read, even in low light
- Automatic changeover capability allows this thermostat to automatically maintain comfort year round
