## **LENNOX INDUSTRIES OFFERS THE MOST ENERGY EFFICIENT COMMERCIAL SPLIT SYSTEM<sup>3</sup>**

DALLAS, TX (May 12, 2004) – Lennox Industries will offer the new S-Class™ 3-5 Ton split system product line, which features the most energy efficient commercial split system<sup>1</sup> in the marketplace. These exceptional units not only help to save money and operating costs through high efficiency levels, but also provide improved comfort and indoor air quality through excellent temperature control and humidity removal capabilities.

The S-Class 3-5 Ton SSA Air Conditioners and SPA Heat Pumps have several additional benefits and features. They are as follows:

- Offers high efficiency levels up to 17.25 SEER and 9.0 HSFP to help reduce energy usage and operating costs.
- Provides a comfortable environment by helping to eliminate temperature swings and control the amount of heating and cooling needed for a building.
- Includes a Copeland UltraTech™ two stage scroll compressor that eliminates humidity efficiently and effectively to improve the indoor air quality of a building.
- Achieves excellent reliability and performance through rigorous design, testing and manufacturing practices, which includes an ISO 9001 certified factory and 100% run testing prior to product shipment.
- Uses R-410A, an environmentally friendlier refrigerant.
- Helps reduce noise distractions and improve the working and learning environment by operating at incredibly low noise levels down to 72 dB.

According to Mike Walker, Lennox Industries Commercial Split Systems Product Manager, “We are thrilled about the lifecycle cost savings the S-Class 3-5 Ton units can offer our customers. These split system products are another example of Lennox’ continual dedication to providing the most innovative and highest quality equipment to the HVAC arena.”

For more information on this superior commercial split system, visit [www.lennox.com](http://www.lennox.com) or call 1-800-9-LENNOX.
