## **T-Class™ Split Systems Win Gold 2009 Dealer Design Award**

**DALLAS, TX – July 13, 2009** – Lennox Industries' innovative solution for simpler installation and service of HVAC systems has won the highest honor in the 2009 Dealer Design Awards sponsored by *The Air Conditioning, Heating & Refrigeration News* magazine. Lennox' T-Class™ line of split systems was selected to receive the Gold award in the HVAC Light Commercial Equipment category for its role in helping contractors be more productive and profitable.

An independent panel of 41 contractors rating entries from 84 different brands judged the T-Class line at the top of its category, thanks to its superior application, installation and service flexibility. Factory-installed high-static drive options, compact units that fit through standard 32" doorways, auto tension belt drives for extended belt life, slide-out blower motors and four-side access on indoor units offer contractors superior installation and servicing convenience. The T-Class line is available in six- to twenty-ton capacities.

"Before we developed the T-Class line, Lennox interviewed HVAC contractors and business owners to identify their specific needs and the challenges they face in profitability," says Denise Ernst, Director of Worldwide Heating & Cooling Commercial Products for Lennox Commercial. "We created a product line that helps contractors win jobs with reliable split systems that can be installed and serviced quickly and efficiently."

More information about the T-Class line of split systems is available at [www.LennoxCommercial.com](http://www.LennoxCommercial.com) or by calling 1-800-9-LENNOX.
