## Addendum to Installation Instructions For ML193UHE, ML193DFE EL195UHNE, EL196UHE, EL196DFE, EL296UHE & EL296DFE

The DOE issued new requirements for indoor blowers in gas furnaces. This requirement was put in place to reduce energy consumption and is effective July 3, 2019. The tables per model must be applied during installation in order to meet the new fan energy rating. These tables supersede any heating speed and circulation speed tables found in the instructions.
