

COMPETITIVE COMPARISON

With Raider® rooftop units, you can save up to \$1,500* when eliminating the use of an adapter curb and the need to move utility connections. The chart below shows the compatibility between popular competitive models and the Raider unit.

Packaged Rooftop Units - 3 to 12.5 Tons

*\$1,500 savings is calculated in replacement jobs where the Raider unit matches the footprint, eliminating the use of an adaptor curb and moving electrical and plumbing connections.

It is the responsibility of the installing contractor to confirm the fit to the existing unit curb.

**Model numbers consist of multiple footprints. Lennox Commercial Raider models only match the full perimeter Carrier Curb version of the unit without bar, not the Day Night Curb.

Note: Due to Lennox Commercial's ongoing commitment to quality, all specifications, ratings and dimensions for Lennox Commercial products are subject to change.

Note: Not all direct replacement numbers are listed, contact your Commercial territory manager for a complete list.
